PROFILE

Analytical and detail-oriented MSc Computer Science student at Trinity College Dublin with strong experience in Python, SQL, and data-driven development. Skilled in web technologies and automation through academic and industry projects, with a solid foundation in problem-solving and algorithms. Passionate about applying technology and analytics to enhance business processes, compliance, and decision-making. Eager to develop expertise at the intersection of data, technology, and finance

EDUCATION

M.Sc In Computer Science - Intelligent Systems 09/2025 – Present
Trinity College Dublin

B.E in Computer Science | CGPA 8.8/10 11/2020 – 04/2024
R.M.K College of Engineering and Technology, Chennai

EXPERIENCE

Web Developer (Intern) 07/2023 – 08/2024
gCurv Technologies LLC

- Developed a full-stack web application using the MERN stack and Puppeteer, automating data extraction from various web pages to improve data collection efficiency by 30%.
- Designed and maintained MongoDB and PostgreSQL databases to handle large-scale scraped data, implementing automated update modules that reduced manual maintenance by 60%.
- Deployed applications on Google Cloud Platform (GCP) and applied Agile methodology

Intern 07/2022 – 08/2022
Hexface Consulting, Chennai

- Built a Python-based question generator module using NumPy and Matplotlib, increasing quiz generation speed by 50% through automation of data formatting into JSON and LaTeX.
- Processed and analyzed datasets from multiple sources (Excel, text files), improving data accuracy by 20% through enhanced validation scripts.

PROJECTS

Web page testing using Selenium 08/2022 – 09/2022
A python project runs in code editor that test website by scraping

- Built a Python-based test automation tool using Selenium for data validation and system reliability analysis.
- Applied statistical checks for error detection and performance consistency.

Resume Analysis using Python
A simple web app using Pyresparser and Streamlit

- Pyresparser** is used to analyze a resume and obtained data is stored. **Streamlit** is used for front-end.
- The system give suggestions and tips to users to improve their resume with the collected data

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate ☑
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional ☑

TECHNICAL SKILLS

Programming Languages

Java, C, JavaScript, Python

Tools and Databases

SQL, MongoDB, Git, Postman, REST API

Frameworks

NodeJS, ReactJS, ExpressJS, Selenium, Numpy

Functionals

Agile, OOP, Data Structures, Algorithms, Problem Solving, Debugging
